# Children's play area with TV

# Entry to opearatories and patient restroom

# Dual hallways with check out area

# Recommendation and contact information

- 8-19-15
- To whom it may concern,
- In 2010 I purchased a building for my dental practice and interviewed several dental equipment specialists. I chose Jamie Phillips for a number of reasons. He has been in the dental business since he was a child and has a vast knowledge of the dental industry on several levels. I still learn valuable information to this day. Jamie was able to draw the architectural design, help organize the general contractor and his team, choose all colors and materials for the office design, and of course chose the appropriate dental equipment. The office was finished on time and within budget. My practice has been working in the building four years. Due to his excellent color and material choice it still looks like new. The work flows well with the layout he designed. The equipment choice has been excellent and functions well. I would be happy to provide my strongest recommendation to anyone regarding choosing Jamie Phillips to work with.
- Sincerely,
- William A. Ryan, D.D.S. <^
